Complete Workflow, Screen Specifications & Roadmap

*57 screens · 14 phases · connection map · API endpoints · delivery roadmap*

# Table of Contents

---

## Phase 1 — Access & Authentication

- Screen 01: Login Screen
- Screen 02: MFA / 2FA Verification
- Screen 03: Forgot Password & Reset
- Screen 04: Profile & Personal Settings
- Screen 05: Notification Center

## Phase 2 — Command Center

- Screen 06: Master Dashboard
- Screen 07: System Health & Monitoring
- Screen 08: Global Search & Command Palette

## Phase 3 — User & Access Management

- Screen 09: User Directory
- Screen 10: Create / Edit User
- Screen 11: Role Management
- Screen 12: Permission Matrix
- Screen 13: Session & Device Management

## Phase 4 — Merchant Lifecycle

- Screen 14: Merchant Directory
- Screen 15: Merchant KYC Review Workspace
- Screen 16: Merchant 360 Profile
- Screen 17: Merchant Agreement Management
- Screen 18: Verification API Logs
- Screen 19: Re-KYC & Suspension Workflow

## Phase 5 — Store & Product Oversight

- Screen 20: Store Network Map
- Screen 21: Store Detail View
- Screen 22: Master Product Catalog
- Screen 23: Category & Brand Master

## Phase 6 — Lender Operations

- Screen 24: Lender Directory
- Screen 25: Lender Configuration
- Screen 26: Waterfall Routing Builder
- Screen 27: Lender Rule Engine
- Screen 28: Lender SLA & Performance Monitor

## Phase 7 — Pricing & Offers

- Screen 29: EMI Master Configuration
- Screen 30: Tenure & Interest Slabs
- Screen 31: Offer Engine Builder
- Screen 32: Offer Approval Queue

## Phase 8 — Loan & Disbursal Management

- Screen 33: Loan Application Monitor
- Screen 34: Loan Detail & Timeline
- Screen 35: Manual Override Console
- Screen 36: Disbursal & Settlement Queue
- Screen 37: Collections & Bounce Management

## Phase 9 — Risk & Fraud

- Screen 38: Fraud Alert Feed
- Screen 39: Blacklist Manager
- Screen 40: Velocity & Risk Rules
- Screen 41: Manual Review Queue

## Phase 10 — Compliance & Audit

- Screen 42: Audit Trail Explorer
- Screen 43: Consent Log Viewer
- Screen 44: Compliance Reports & Exports

## Phase 11 — Analytics & Business Intelligence

- Screen 45: Business Analytics Dashboard
- Screen 46: Lender & Loan Analytics
- Screen 47: Sales & Region Analytics
- Screen 48: Custom Report Builder

## Phase 12 — Notifications & Document Management

- Screen 49: Notification Template Manager
- Screen 50: Communication Logs
- Screen 51: Document Repository

## Phase 13 — System & Integrations

- Screen 52: Workflow Builder
- Screen 53: Third-Party Integration Switchboard
- Screen 54: Feature Flags & A/B Tests
- Screen 55: System Parameters & Settings

## Phase 14 — Support & Helpdesk

- Screen 56: Master Ticket Queue
- Screen 57: Ticket Detail & SLA Tracking

## Appendix

- A. Role Connection Map
- B. Inter-role Connection Matrix
- C. Permissions Summary
- D. Module to Screen Mapping
- E. Suggested API Endpoints
- F. Development Roadmap

## Phase 1 Access & Authentication

Secure entry points for the Super Admin. Hardened with MFA, IP allowlist, and session tracking because this role has the highest privilege on the platform.

Screen 01

### Login Screen

[Auth | Entry]

Primary entry point with email/password plus CAPTCHA after failed attempts.

- Email / password fields with strength indicator on reset
- CAPTCHA appears after 3 failed attempts in 10 minutes
- Remember-device toggle linked to Session module
- Brute-force lockout with admin alert via SMS
- SSO placeholder for future Google / Microsoft login

Screen 02

### MFA / 2FA Verification

[Security | Mandatory]

Mandatory second factor for every Super Admin login — TOTP or SMS OTP.

- 6-digit TOTP from Google Authenticator / Authy
- Fallback SMS OTP if TOTP unavailable
- Backup recovery codes view + regenerate
- Trusted-device skip-MFA toggle with configurable expiry
- MFA reset audit log entry

Screen 03

### Forgot Password & Reset

[Recovery | Self-service]

Self-service password reset with email plus mobile OTP verification.

- Email input with mobile OTP as second factor
- New password with complexity meter and history check (last 5)
- Reset link expiry timer (15 minutes default)
- All active sessions invalidated on successful reset
- Notification to registered email and mobile on reset

Screen 04

### Profile & Personal Settings

[Self | Preferences]

Personal profile, password change, MFA setup, notification preferences.

- Edit personal details — name, mobile, profile photo
- Change password with current-password confirmation
- Enable / disable / reconfigure MFA
- Notification channel preferences (in-app, email, SMS, WhatsApp)
- Theme toggle (light / dark) and timezone selector

Screen 05

### Notification Center

[Alerts | Inbox]

Centralised inbox for system alerts, approval requests, and operational events.

- Tabs: All / Approvals / Alerts / System / Mentions
- Priority colour coding — critical / high / medium / info
- Mark read, snooze, archive, bulk actions
- Click-through to relevant screen with context preserved
- Search and date filter

## Phase 2    Command Center

The mission-control surface. Live KPIs, system health, and a global search that jumps to any record across the platform.

Screen 06

### Master Dashboard

[Platform-wide | Live KPIs]

Single pane of glass — every critical metric across all merchants, stores, and lenders.

- Top KPIs — total merchants, active stores, lenders live, today's disbursements
- Revenue and disbursement trend chart with 7d / 30d / 90d toggle
- Live application stream and recent merchant signups
- Action tray — pending approvals, SLA breaches, fraud flags
- Quick actions — approve merchant, add lender, broadcast notice

Screen 07

### System Health & Monitoring

[Ops | Real-time]

Real-time view of API health, queue depth, error rates, and third-party integration status.

- API uptime per service (Auth, Merchant, Loan, Lender, Notification)
- Queue depth — Redis jobs pending / failed / retried
- Third-party API status (Bureau, eSign, eNACH, GST, PAN)
- Error log feed with stack trace preview
- Trigger maintenance mode toggle with banner config

Screen 08

### Global Search & Command Palette

[Search | Cmd+K]

Universal search across merchants, loans, customers, tickets, users with keyboard shortcuts.

- Cmd+K palette accessible from any screen
- Searches across merchants, stores, loans, customers, users, tickets
- Type-ahead with category grouping and recent items
- Saved searches and pinned shortcuts per user
- Quick-action commands — approve last merchant, open audit log

## Phase 3 User & Access Management

The control plane for every login on the platform. Define roles, fine-grained permissions, enforce MFA, and track every session.

Screen 09

### User Directory

[All roles | Search]

List of every user across every role with filters and bulk actions.

- Filter by role, merchant, status (active / disabled), last login
- Bulk actions — disable, reset password, force MFA setup
- Inline status chips and last-active timestamp
- Export user list as CSV with permissions snapshot
- Quick row actions — impersonate (with audit), view activity, edit

Screen 10

### Create / Edit User

[Onboarding | Forms]

Add or edit a user, assign role, scope to merchant or store, configure MFA.

- Fields — name, email, mobile, role, merchant, store scope
- Multi-select store assignment for Store Managers and Sales Execs
- Send invite via email and SMS with first-login link
- Force MFA toggle and password expiry policy
- Activation date / deactivation date for time-bound access

Screen 11

### Role Management

[Roles | RBAC]

View, create, and clone roles with assignment to user groups.

- Built-in roles — Super Admin, Merchant Admin, Store Manager, Sales Exec, Lender Ops, Risk User, Customer
- Clone role to create custom variants
- Role description, scope, and inheritance
- User count and last-modified per role
- Role archive (soft-delete) with reassignment flow

Screen 12

### Permission Matrix

[Granular | RBAC]

Module by action matrix — toggle exactly what each role can do.

- Modules as rows; actions as columns (View / Create / Edit / Delete / Approve / Reject / Export)
- Bulk-toggle by row or column with confirmation
- Conditional permissions — e.g. approve only if amount < threshold
- Diff viewer comparing two roles
- Permission change audit with rollback to previous matrix

Screen 13

### Session & Device Management

[Security | Active sessions]

Monitor and revoke active sessions across all users.

- Active sessions feed — user, role, IP, device, login time
- Force logout single session or all sessions per user
- IP allowlist and denylist per role
- Concurrent session limit configuration per role
- Suspicious-session flag (new device, new geo, unusual hour)

## Phase 4 Merchant Lifecycle

Where Sales Executive submissions land for approval. End-to-end merchant lifecycle from KYC review to suspension and re-KYC.

Screen 14

### Merchant Directory

[List | Workflow]

All merchants on the platform with workflow status chips.

- Filter by status — Draft / Submitted / Under Review / Approved / Rejected / Re-KYC / Suspended
- Filter by region, category, sales exec, signup date
- Inline metrics — store count, disbursal volume, NPA
- Bulk approve / reject with mandatory comment
- Export merchant list with KYC and verification snapshot

Screen 15

### Merchant KYC Review Workspace

[Approval | KYC]

Side-by-side document viewer with verification API results and decision buttons.

- Document viewer — GST cert, PAN, Aadhaar, cancelled cheque, shop license
- Verification API results panel — GST status, PAN status, bank penny-drop
- Approve / Reject / Request Re-KYC with mandatory reason
- Internal notes thread (not visible to merchant)
- Decision audit stamp — user, time, IP, payload

Screen 16

### Merchant 360 Profile

[Detail | Read+Edit]

Complete merchant view — business info, stores, products, loans, settlements, risk.

- Tabs — Profile / Stores / Products / Loans / Settlements / Risk / Audit
- Edit business details with audit trail
- View linked users (Merchant Admin, Store Managers)
- Performance card — disbursals, approval, NPA, last 90 days
- Quick actions — suspend, send notice, escalate to risk

Screen 17

### Merchant Agreement Management

[Legal | eSign]

Manage merchant agreements — generation, eSign tracking, archival, renewal.

- Generate agreement PDF from template with merchant variables
- Send for eSign via Digio / Leegality with status polling
- Versioning — view, compare, archive prior agreements
- Renewal scheduler with auto-reminders at T-30, T-7, T-0
- Bulk regenerate when template changes

Screen 18

### Verification API Logs

[Audit | Integrations]

Raw logs of every verification call — GST, PAN, bank, Aadhaar — for any merchant.

- Filter by merchant, API type, status, date range
- Request / response payload viewer with sensitive-data masking
- Retry failed verification with one click
- API provider switching (e.g. Karza vs Surepass) per call type
- Cost-per-call counter and monthly billing summary

Screen 19

### Re-KYC & Suspension Workflow

[Compliance | Lifecycle]

Trigger re-KYC, suspend, or reactivate merchants with full reason logging.

- Re-KYC trigger — mandatory docs list, deadline, notification
- Suspend merchant — auto-disables stores and user logins
- Reactivation workflow with re-verification checklist
- Suspension reasons taxonomy (fraud, NPA, compliance, voluntary)
- Bulk re-KYC for cohorts (e.g. all merchants in a state)

## Phase 5    Store & Product Oversight

Bird's-eye visibility into every physical store and every SKU on the platform, with override controls.

Screen 20

### Store Network Map

[Geo | Cluster]

Map view of every store across the country with clustering, filters, and drill-down.

- Cluster pins by region with zoom-in expansion
- Filter by merchant, status, disbursal range, last-active
- Click pin to open store detail drawer
- Geo-tag mismatch flags (declared vs detected location)
- Export map as PNG / PDF for reports

Screen 21

### Store Detail View

[Read-only | Override]

Single-store deep dive — manager assignment, inventory, loans, performance.

- Store identity — name, address, timings, geo-pin, photos
- Assigned manager and recent logins
- Linked products with inventory snapshot
- Loan applications originating from this store (last 30 / 90 days)
- Force-deactivate store with reason and merchant notification

Screen 22

### Master Product Catalog

[Cross-merchant | Audit]

Every product across every merchant — search, audit, flag, force-delist.

- Filter by category, brand, merchant, price band, financing eligibility
- Duplicate SKU detection across merchants
- Flag product for compliance review
- Force-delist with reason (counterfeit, mispriced, banned)
- Bulk financing-eligibility toggle by category

Screen 23

### Category & Brand Master

[Taxonomy | Config]

Manage the master taxonomy — categories, sub-categories, brands — used across all merchants.

- Add / edit / merge categories with hierarchy
- Brand directory with logo and approval status
- Map merchant-uploaded categories to master taxonomy
- Set default financing rules per category (down-payment, tenure)
- Archive category with reassignment flow

## Phase 6 Lender Operations

The decisioning brain — onboard lenders, build the waterfall, define routing rules, monitor SLA. Every customer loan journey is shaped here.

Screen 24

### Lender Directory

[List | Status]

All integrated lenders with live API status, volume contribution, and quick toggle.

- Lender cards — logo, name, API status (live / degraded / down)
- Volume contribution and approval rate (last 30 days)
- Toggle lender on / off platform-wide
- Quick links — config, rules, SLA, commission
- Search and filter by category support, region, status

Screen 25

### Lender Configuration

[Onboard | API]

Add or edit a lender — credentials, endpoints, supported categories, commission.

- API base URL, keys, secrets (encrypted at rest)
- Webhook endpoints for status updates
- Supported product categories, tenures, min / max loan amount
- Commission structure — flat / percentage / tiered slabs
- Test connection with sample payload and response viewer

Screen 26

### Waterfall Routing Builder

[Visual | Drag-drop]

Visually build the cascade — which lender tries first, which is the fallback, in what order.

- Drag-and-drop lender cards into priority order
- Per-category waterfall (mobiles vs appliances vs furniture)
- Geographic waterfall (state-level overrides)
- Time-of-day routing (peak hours vs off-peak)
- Simulator — paste application JSON, see routing decision

Screen 27

### Lender Rule Engine

[Conditional | If-then]

Conditional rules — route by credit score, income, location, EMI amount, category.

- Visual rule builder — if-then-else with AND / OR clauses
- Variables — credit score, income, age, location, EMI amount, category
- Rule versioning with draft / active / archived
- A/B test two rule sets with traffic split
- Rule audit — who changed what, when, why

Screen 28

### Lender SLA & Performance Monitor

[Metrics | SLA]

Live SLA tracking per lender — API response time, approval latency, disbursal speed.

- P50 / P95 / P99 latency per lender API
- Approval rate, rejection reasons breakdown
- Average disbursal time from approval to credit
- SLA breach alerts with auto-deprioritisation rule
- Lender scorecard export for monthly review

## Phase 7 Pricing & Offers

Master pricing grid that every merchant inherits. Approve merchant override requests, run platform offers, and manage subvention splits.

Screen 29

### EMI Master Configuration

[Global | Inheritance]

Platform-wide EMI types and base rules — merchants configure within these bounds.

- Global EMI types — no-cost / interest-bearing / deferred
- Default interest slabs by tenure
- Min / max loan amount per EMI type
- Enable / disable EMI type per merchant tier (Bronze / Silver / Gold)
- Effective-from date with future-dated changes

Screen 30

### Tenure & Interest Slabs

[Slabs | Matrix]

Tenure list with interest slabs, processing fees, and merchant-tier overrides.

- Tenure master — 3 / 6 / 9 / 12 / 18 / 24 months
- Interest slab per tenure
- Processing fee — flat or percentage with cap
- Tier-based overrides (Gold merchants get lower rates)
- Bulk import / export slab matrix as CSV

Screen 31

### Offer Engine Builder

[Campaigns | Scope]

Create platform-wide offers with flexible scope and scheduling.

- Offer type — flat / percentage / cashback / coupon code
- Scope — platform / merchant tier / category / lender / tenure / geo
- Schedule — start, end, recurrence, blackout dates
- Budget cap with auto-pause when exhausted
- Festival templates (Diwali, Big Billion Day, Republic Day, EOSS)

Screen 32

### Offer Approval Queue

[Approval | Merchant offers]

Review and approve offers that Merchant Admins submit from their portal.

- Pending offers list with merchant, scope, budget, expected ROI
- Preview offer as customer would see it
- Approve / Reject / Request changes with reason
- Compliance check — discount within RBI guidelines
- Auto-approval rules for trusted merchants under threshold

## Phase 8      Loan & Disbursal Management

Every loan from origination to closure. Manual intervention powers, stuck-application detection, and end-to-end repayment oversight.

Screen 33

### Loan Application Monitor

[All loans | Filter]

Every customer loan application across the platform in one searchable table.

- Filters — merchant, store, lender, status, date, amount range
- Status pipeline chip — Initiated to KYC to Bureau to Approved to eSign to eNACH to Disbursed
- Stuck-application badge when stage exceeds SLA
- Bulk export with full timeline per application
- Saved filter views for daily monitoring

Screen 34

### Loan Detail & Timeline

[Single loan | Timeline]

Drill-down into one loan — customer, merchant, lender, every event with timestamp.

- Header — customer, merchant, store, amount, EMI plan, current status
- Vertical timeline — every event with payload (KYC submitted, bureau pulled, lender called)
- Documents tab — KFS, agreement, eNACH, invoice
- Communication log — every SMS / email / WhatsApp sent
- Action panel — force-stage-advance, cancel, refund, escalate

Screen 35

### Manual Override Console

[Override | High-trust]

High-privilege screen — force approve, override rejection, redirect lender, trigger disbursal.

- Force-approve loan with mandatory justification
- Override lender rejection and re-route to another lender
- Manual disbursal trigger with bank account verification
- Refund / reversal initiator with finance approval workflow
- Mandatory reason and dual-approval for every override

Screen 36

### Disbursal & Settlement Queue

[Finance | Recon]

Disbursal pipeline and merchant settlement reconciliation.

- Pending disbursals grouped by lender with batch trigger
- Settlement batch — date, merchant, gross, fees, net, UTR
- Reconciliation status — matched / unmatched / disputed
- Download settlement file in lender / bank-specific format
- Dispute resolution thread per settlement entry

Screen 37

### Collections & Bounce Management

[NPA | DPD]

Overdue accounts, bounce events, DPD tracking, collection agent assignment.

- DPD buckets — 0-30, 31-60, 61-90, 90+ with counts and value
- Bounce event feed with auto-retry status
- Collection agent assignment by region or DPD bucket
- Foreclosure / settlement / NOC generation
- NPA tagging and write-off workflow

## Phase 9 Risk & Fraud

Live fraud surveillance, blacklist control, velocity rules, and the manual review queue for borderline cases flagged by the risk engine.

Screen 38

### Fraud Alert Feed

[Live | Stream]

Real-time stream of fraud signals — device, IP, geo, velocity, document.

- Live feed with signal type, severity, customer, merchant
- Filter by signal type — device, IP reputation, geo mismatch, fake invoice
- One-click block / unblock / escalate from feed
- Heatmap of fraud hotspots by region and merchant
- Daily / weekly fraud report auto-generated

Screen 39

### Blacklist Manager

[Block | Lifecycle]

Centralised blacklist for PAN, mobile, device, Aadhaar with reason and expiry.

- Blacklist categories — PAN, mobile, device fingerprint, Aadhaar, bank account
- Add entry with reason, source, expiry date, severity
- Bulk import via CSV with validation
- Search and remove with audit-stamped reason
- Whitelist override for false positives with dual approval

Screen 40

### Velocity & Risk Rules

[Rules | Thresholds]

Configure velocity thresholds and risk-scoring rules.

- Velocity rules — N loans per PAN in X days, device reuse limit
- Risk score weighting — bureau, income, employment, behaviour
- Customer and merchant risk score thresholds
- Auto-action rules — flag / hold / reject when threshold breached
- Rule simulator with historical replay

Screen 41

### Manual Review Queue

[Borderline | Decision]

Applications flagged by the risk engine for human review.

- Queue grouped by risk score band and urgency
- Full application context with risk signals highlighted
- Approve / Reject / Escalate to senior reviewer
- Reviewer SLA timer with auto-escalation
- Reviewer scorecard — accuracy, throughput, false-positive rate

## Phase 10 Compliance & Audit

Regulator-facing surface. Every action is logged immutably, every consent is retrievable, every data principal request can be honoured in one click.

Screen 42

### Audit Trail Explorer

[Immutable | Forensic]

Searchable, immutable log of every action by every user across the platform.

- Filters — user, role, module, action, date, IP, device
- Payload diff viewer (before / after)
- Export filtered audit slice for regulator on demand
- Anomaly detection — unusual access patterns flagged
- Tamper-evidence hash chain verification

Screen 43

### Consent Log Viewer

[RBI | KFS]

Every consent ever recorded — RBI Key Facts, terms, data sharing, marketing.

- Consent record viewer with timestamp, IP, device, version
- Search by customer / merchant / consent type
- Withdrawal flow — process data principal withdrawal request
- Version diff — what changed in T&C between consents
- Bulk export for regulatory inspection

Screen 44

### Compliance Reports & Exports

[RBI | DPDP]

One-click generation of regulator-mandated reports.

- RBI returns — monthly / quarterly with auto-population
- DPDP data principal request handler (access, correction, erasure)
- Data masking policy editor per role
- Retention policy per data category with auto-archive
- Audit-ready compliance dashboard with checklist

## Phase 11 Analytics & Business Intelligence

Cross-merchant, cross-lender, cross-region BI. From executive summaries to custom report builders for ops, finance, and risk teams.

Screen 45

### Business Analytics Dashboard

#### [Executive | KPIs]

Executive view — disbursements, revenue, growth, market share, cohort retention.

- Disbursement trend with YoY / MoM comparison
- Revenue waterfall — interest, fees, commission, subvention
- Cohort retention by merchant signup month
- Funnel — applications to approved to disbursed to repaid
- Save as snapshot for board reporting

Screen 46

### Lender & Loan Analytics

#### [Lender BI]

Lender-level performance — approval rate, NPA, SLA, contribution to volume.

- Lender scorecard — approval, NPA, SLA adherence, volume share
- Rejection reason breakdown per lender
- Tenure-wise and category-wise disbursement mix
- Lender comparison view side by side
- Trigger renegotiation alert if NPA crosses threshold

Screen 47

### Sales & Region Analytics

#### [Sales BI | Geo]

Sales executive productivity and regional performance heatmap.

- Sales exec leaderboard — leads, conversions, approval rate
- Region heatmap — merchants, stores, disbursements per state / city
- Drill-down from region to store to loan
- Underperforming region alerts with recommended action
- Sales pipeline funnel by exec and region

Screen 48

### Custom Report Builder

#### [Self-serve BI]

Drag-and-drop report builder — pick fields, filters, group-by, chart type, schedule.

- Field picker from all modules with relationships
- Filter, group-by, aggregate, chart type configurator
- Save report, share with team, schedule email delivery
- Export — CSV, Excel, PDF, JSON
- Report version history and audit

## Phase 12 Notifications & Document Management

Every outbound message and every uploaded document, controlled centrally. Templates, channel routing, delivery logs, and the document repository.

Screen 49

### Notification Template Manager

[Templates | Multi-channel]

Manage SMS, email, WhatsApp, and push templates with variables and approval workflow.

- Template editor with variable picker (customer\_name, loan\_amount)
- Channel-specific variants for SMS / email / WhatsApp / push
- Version control with diff and rollback
- Sender ID and template ID mapping (DLT-compliant for SMS)
- Test send to internal email / mobile before going live

Screen 50

### Communication Logs

[Delivery | Audit]

Every notification ever sent with delivery status and click tracking.

- Filter by channel, recipient, template, status, date
- Delivery status — sent / delivered / read / clicked / failed
- Provider-level details (MSG91, Meta WA, SES)
- Resend failed notifications in bulk
- Cost-per-channel monthly summary

Screen 51

### Document Repository

[Storage | OCR]

Central document vault — KYC, agreements, invoices, statements — with OCR and virus scan.

- Search by type, customer / merchant, date, OCR text
- Preview with redaction overlay for sensitive fields
- Versioning, soft-delete, retention policy per type
- OCR re-run and document classifier retraining trigger
- Signed-URL generator for time-bound shares

## Phase 13 System & Integrations

Configure the rails everything else runs on — workflows, third-party integrations, feature flags, maintenance mode, system parameters.

Screen 52

### Workflow Builder

[Visual | Approval chains]

Visually build approval chains, escalations, and routing logic.

- Drag-and-drop workflow canvas with nodes (start, decision, action, end)
- Pre-built workflows — merchant onboarding, offer approval, override approval
- Conditional routing based on data attributes
- Escalation rules with SLA timers per node
- Version control, draft / publish, audit

Screen 53

### Third-Party Integration Switchboard

[Integrations | Toggles]

Configure and toggle every external integration in one place.

- Categories — Bureau (Experian / CRIF / CIBIL), eSign (Digio / Leegality), eNACH, Penny drop, GST, PAN, Aadhaar
- Active / fallback provider per category
- API credentials with rotation reminders
- Cost-per-call and monthly billing summary per provider
- Health check and last-success timestamp per integration

Screen 54

### Feature Flags & A/B Tests

[Rollout | Experiments]

Gradual feature rollout and A/B testing across merchant cohorts.

- Feature flag list with on / off / partial-rollout status
- Cohort targeting — by merchant tier, region, signup date
- A/B test configuration with traffic split and metrics
- Kill-switch toggle with one-click full disable
- Audit trail of every flag change

Screen 55

### System Parameters & Settings

[Config | Platform]

Platform-wide parameters — rates, fees, OTP expiry, retry limits, default SLAs.

- Default interest rates, processing fees, late-payment fees
- OTP expiry (in minutes) and retry limits
- Default SLAs per workflow stage
- Maintenance mode toggle with custom banner message
- Audit log of every parameter change

## Phase 14 Support & Helpdesk

Master ticket queue spanning every other role — merchant disputes, customer complaints, lender issues, internal escalations.

Screen 56

### Master Ticket Queue

[Helpdesk | Cross-tenant]

Every support ticket from every portal — merchant, customer, store, lender ops — in one queue.

- Filter by source role, category, priority, status, SLA state
- Auto-assignment rules based on category and load
- Bulk reassign, close, escalate
- SLA breach alerts with auto-escalation matrix
- Linked entity drill-down — loan, merchant, customer

Screen 57

### Ticket Detail & SLA Tracking

[Thread | SLA]

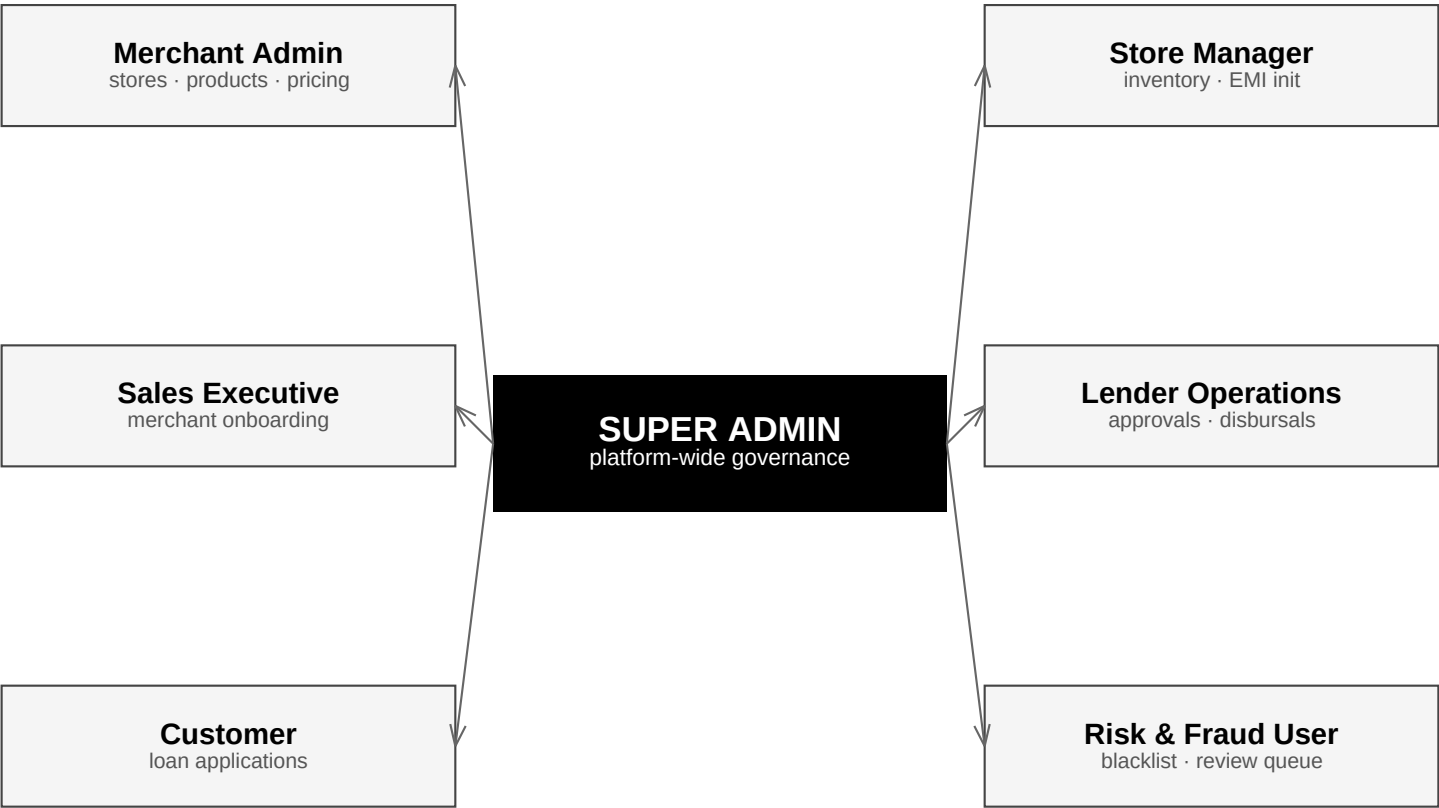

Single ticket workspace — thread, attachments, linked records, SLA timer, internal notes.

- Conversation thread with merchant / customer / internal notes toggle
- Attachment viewer with redaction for sensitive fields
- Linked records — loan, merchant, settlement, agreement
- SLA countdown with breach prediction
- Resolution with category tagging and CSAT trigger

# Appendix A — Role Connection Map

Super Admin sits at the center of the platform. Every other role inherits configuration, permissions, and oversight from Super Admin. The diagram below shows the governance flow.

Arrows indicate direction of governance. Every other role depends on configuration set in Super Admin's portal.

## Appendix B — Inter-role Connection Matrix

For each other role on the platform, this matrix lists exactly which Super Admin screens govern, configure, or oversee them. Use this to align contracts between backend teams.

|                               |                                                                                                                                                                                                                                                                                                                                                                |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Merchant Admin</b>         | <ul style="list-style-type: none"><li>• Screen 14-19 approve / suspend their account and govern KYC</li><li>• Screen 29-32 set EMI / offer ceilings they configure within</li><li>• Screen 32 approves offers they submit</li><li>• Screen 22-23 maintains the master taxonomy they map into</li><li>• Screen 36 generates settlements they download</li></ul> |
| <b>Store Manager</b>          | <ul style="list-style-type: none"><li>• Screen 9-12 creates / disables their login and scopes them to stores</li><li>• Screen 20-21 force-deactivates their store if needed</li><li>• Screen 33-34 monitors every EMI application they initiate</li><li>• Screen 22 force-delists products they sell</li></ul>                                                 |
| <b>Sales Executive</b>        | <ul style="list-style-type: none"><li>• Screen 9-12 creates them as a user under Super Admin</li><li>• Screen 14-15 reviews and approves merchants they onboard</li><li>• Screen 47 tracks their productivity and leaderboard rank</li><li>• Screen 18 sees verification API logs for their submissions</li></ul>                                              |
| <b>Customer</b>               | <ul style="list-style-type: none"><li>• Screen 26-27 routes their loan to the right lender silently</li><li>• Screen 38-41 risk-screens their application end-to-end</li><li>• Screen 33-35 has manual override on their loan status</li><li>• Screen 56-57 receives their support escalations</li></ul>                                                       |
| <b>Lender Operations User</b> | <ul style="list-style-type: none"><li>• Screen 9-12 creates their login with scoped lender access</li><li>• Screen 25 onboards their lender and provisions API credentials</li><li>• Screen 28 monitors their SLA performance</li><li>• Screen 35 can override their decisions when justified</li></ul>                                                        |
| <b>Risk &amp; Fraud User</b>  | <ul style="list-style-type: none"><li>• Screen 9-12 creates their login with risk-module permissions</li><li>• Screen 40 sets the rules they apply day-to-day</li><li>• Screen 41 monitors their review queue and accuracy</li><li>• Screen 39 maintains the blacklist they enforce</li></ul>                                                                  |

## Appendix C — Permissions Summary

Super Admin has unrestricted access across the platform. The list below captures every privilege bundle, mirrored from PRD §4.1.

### Allowed

|                          |                                                           |
|--------------------------|-----------------------------------------------------------|
| • Full system access     | Read and write across every module                        |
| • Merchant approvals     | Approve, reject, suspend, re-KYC any merchant             |
| • Lender configuration   | Onboard, configure, deactivate any lender                 |
| • Pricing & EMI control  | Master EMI rules, tenure slabs, subvention split          |
| • Offer management       | Create platform offers; approve merchant offers           |
| • Risk monitoring        | Blacklist, velocity rules, manual review oversight        |
| • Analytics access       | Cross-merchant, cross-lender, cross-region BI             |
| • User & RBAC management | Create users, define roles, set permission matrix         |
| • Loan override          | Force approve, reject, redirect lender, trigger disbursal |
| • Audit & compliance     | Full audit trail, consent logs, RBI / DPDP exports        |
| • System configuration   | Integrations, feature flags, parameters, maintenance      |
| • Support escalation     | Master ticket queue across every other role               |

### Restricted (even Super Admin)

|                                          |                                                       |
|------------------------------------------|-------------------------------------------------------|
| • Cannot impersonate without audit       | All impersonation actions auto-logged with reason     |
| • Cannot bypass MFA on own account       | MFA is enforced even for Super Admin                  |
| • Cannot delete audit logs               | Audit trail is append-only and tamper-evident         |
| • Dual approval for high-value overrides | Manual disbursements over threshold need second admin |

## Appendix D — PRD Module to Screen Mapping

Maps every PRD module to the Super Admin screens that implement it. Use this for backend module ownership and sprint planning.

| PRD Module                             | Screens                |
|----------------------------------------|------------------------|
| Authentication & Security (PRD §5)     | 01, 02, 03, 04, 13     |
| User & RBAC Management (PRD §4, §16)   | 09, 10, 11, 12, 13     |
| Merchant Onboarding (PRD §6)           | 14, 15, 16, 17, 18, 19 |
| Store Management (PRD §7)              | 20, 21                 |
| Product Management (PRD §8)            | 22, 23                 |
| Pricing & Offer Engine (PRD §9)        | 29, 30, 31, 32         |
| Multi-Lender Decisioning (PRD §11)     | 24, 25, 26, 27, 28     |
| Loan Management System (PRD §12)       | 33, 34, 35, 36, 37     |
| Risk & Fraud Engine (PRD §13)          | 38, 39, 40, 41         |
| Audit & Compliance (PRD §20)           | 42, 43, 44             |
| Analytics & Reporting (PRD §17)        | 45, 46, 47, 48         |
| Notification System (PRD §14)          | 49, 50                 |
| Document Management (PRD §15)          | 51                     |
| Workflow Engine (PRD §19)              | 52                     |
| API Integration Layer (PRD §18)        | 53                     |
| Admin Panel — Config (PRD §16)         | 54, 55                 |
| Customer Support & Ticketing (PRD §21) | 56, 57                 |
| Dashboard & Monitoring (PRD §16)       | 06, 07, 08, 05         |

## Appendix E — Suggested API Endpoints (Laravel)

Recommended REST endpoints organised by module. Designed for Laravel route groups under `/api/admin` with JWT plus MFA middleware and module-level permission gates.

### Authentication & Profile

|      |                                 |                                       |
|------|---------------------------------|---------------------------------------|
| POST | /api/admin/auth/login           | Super Admin login with email/password |
| POST | /api/admin/auth/mfa/verify      | Verify TOTP / SMS OTP                 |
| POST | /api/admin/auth/forgot-password | Trigger password reset flow           |
| GET  | /api/admin/profile              | Get logged-in admin profile           |
| PUT  | /api/admin/profile              | Update profile and preferences        |

### User & RBAC

|      |                                   |                               |
|------|-----------------------------------|-------------------------------|
| GET  | /api/admin/users                  | List users with filters       |
| POST | /api/admin/users                  | Create user and send invite   |
| PUT  | /api/admin/users/{id}             | Update user details and scope |
| POST | /api/admin/users/{id}/disable     | Disable user with reason      |
| GET  | /api/admin/roles                  | List all roles                |
| POST | /api/admin/roles                  | Create / clone role           |
| PUT  | /api/admin/roles/{id}/permissions | Update permission matrix      |
| GET  | /api/admin/sessions               | List active sessions          |
| POST | /api/admin/sessions/{id}/revoke   | Force logout a session        |

### Merchant Lifecycle

|      |                                             |                                      |
|------|---------------------------------------------|--------------------------------------|
| GET  | /api/admin/merchants                        | List merchants with workflow filters |
| GET  | /api/admin/merchants/{id}                   | Get 360-degree merchant profile      |
| POST | /api/admin/merchants/{id}/approve           | Approve merchant onboarding          |
| POST | /api/admin/merchants/{id}/reject            | Reject with reason                   |
| POST | /api/admin/merchants/{id}/re-kyc            | Trigger Re-KYC workflow              |
| POST | /api/admin/merchants/{id}/suspend           | Suspend merchant                     |
| GET  | /api/admin/merchants/{id}/verification-logs | Verification API logs                |
| POST | /api/admin/merchants/{id}/agreement         | Generate / regenerate agreement      |

### Lender & Routing

|      |                               |                                     |
|------|-------------------------------|-------------------------------------|
| GET  | /api/admin/lenders            | List integrated lenders             |
| POST | /api/admin/lenders            | Onboard new lender                  |
| PUT  | /api/admin/lenders/{id}       | Update lender configuration         |
| GET  | /api/admin/lenders/{id}/sla   | Get SLA metrics                     |
| GET  | /api/admin/waterfall          | Get current waterfall config        |
| PUT  | /api/admin/waterfall          | Update waterfall order              |
| POST | /api/admin/waterfall/simulate | Simulate routing for sample payload |
| POST | /api/admin/lender-rules       | Create / update lender rule         |

### Pricing & Offers

|      |                                |                                   |
|------|--------------------------------|-----------------------------------|
| GET  | /api/admin/emi-config          | Get global EMI configuration      |
| PUT  | /api/admin/emi-config          | Update master EMI rules           |
| GET  | /api/admin/tenure-slabs        | Get tenure & interest slab matrix |
| POST | /api/admin/offers              | Create platform-wide offer        |
| GET  | /api/admin/offers/pending      | Pending merchant-submitted offers |
| POST | /api/admin/offers/{id}/approve | Approve merchant offer            |

## Appendix E — Suggested API Endpoints (continued)

### Loan & Disbursal

|      |                                |                                  |
|------|--------------------------------|----------------------------------|
| GET  | /api/admin/loans               | List all loans with filters      |
| GET  | /api/admin/loans/{id}          | Loan detail with full timeline   |
| POST | /api/admin/loans/{id}/override | Manual override action           |
| POST | /api/admin/loans/{id}/disburse | Trigger manual disbursal         |
| GET  | /api/admin/settlements         | List settlement batches          |
| GET  | /api/admin/collections         | DPD buckets and collections view |

### Risk & Fraud

|        |                           |                             |
|--------|---------------------------|-----------------------------|
| GET    | /api/admin/fraud-alerts   | Live fraud alert feed       |
| GET    | /api/admin/blacklist      | List blacklist entries      |
| POST   | /api/admin/blacklist      | Add to blacklist            |
| DELETE | /api/admin/blacklist/{id} | Remove from blacklist       |
| GET    | /api/admin/risk-rules     | Get risk and velocity rules |
| PUT    | /api/admin/risk-rules     | Update rules                |
| GET    | /api/admin/review-queue   | Manual review queue         |

### Audit & Compliance

|      |                              |                               |
|------|------------------------------|-------------------------------|
| GET  | /api/admin/audit-logs        | Search audit trail            |
| GET  | /api/admin/consent-logs      | Consent log viewer            |
| POST | /api/admin/compliance/export | Generate compliance report    |
| POST | /api/admin/dpdp/request      | Handle data principal request |

### Analytics & Reports

|      |                               |                             |
|------|-------------------------------|-----------------------------|
| GET  | /api/admin/analytics/business | Business KPIs               |
| GET  | /api/admin/analytics/lender   | Lender scorecard            |
| GET  | /api/admin/analytics/sales    | Sales executive leaderboard |
| POST | /api/admin/reports/custom     | Run custom report           |

### System & Integrations

|     |                                |                               |
|-----|--------------------------------|-------------------------------|
| GET | /api/admin/integrations        | List third-party integrations |
| PUT | /api/admin/integrations/{id}   | Update integration config     |
| GET | /api/admin/feature-flags       | List feature flags            |
| PUT | /api/admin/feature-flags/{key} | Toggle / configure flag       |
| PUT | /api/admin/system/maintenance  | Toggle maintenance mode       |
| PUT | /api/admin/system/parameters   | Update system parameters      |

### Notifications & Support

|     |                               |                                 |
|-----|-------------------------------|---------------------------------|
| GET | /api/admin/templates          | List notification templates     |
| PUT | /api/admin/templates/{id}     | Update template with versioning |
| GET | /api/admin/communication-logs | Delivery logs                   |
| GET | /api/admin/tickets            | Master ticket queue             |
| PUT | /api/admin/tickets/{id}       | Update / respond to ticket      |

## Appendix F — Development Roadmap

Phased delivery aligned with PRD §30. Each phase lists target weeks, the goal, the screens delivered, and the key technical deliverables.

### Phase 1 — Core Foundation

Weeks 1-8

Stand up authentication, RBAC, merchant onboarding approval, and the admin command center.

**Screens:** 01, 02, 03, 04, 05, 06, 07, 08, 09, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 55

#### Key deliverables:

- JWT plus MFA auth for Super Admin
- User / role / permission CRUD with Spatie Permission
- Merchant approval workflow with KYC viewer
- Master dashboard with live KPIs
- Store and product master oversight

### Phase 2 — Financing Journey

Weeks 9-16

Activate lender integrations, master pricing, offer engine, and loan monitoring.

**Screens:** 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37

#### Key deliverables:

- Lender onboarding and waterfall builder
- Rule engine for lender routing
- EMI master and merchant override flow
- Loan monitor with manual override console
- Disbursal and settlement reconciliation

### Phase 3 — Risk, Analytics & Compliance

Weeks 17-22

Fraud engine, compliance trail, analytics, notifications, documents.

**Screens:** 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 56, 57

#### Key deliverables:

- Fraud alert feed and blacklist manager
- Audit trail with tamper-evident hashing
- Custom report builder
- Notification templates with multi-channel delivery
- Master ticket queue across all portals

### Phase 4 — Scale & Advanced

Weeks 23-30

Workflow builder, feature flags, AWS migration, AI-driven enhancements.

**Screens:** 52, 53, 54

#### Key deliverables:

- Visual workflow builder
- Third-party integration switchboard
- Feature flags and A/B test framework
- AWS S3 storage migration and CDN
- AI-assisted fraud scoring (future)
